## INTRODUCTION

The annual Statements of Community District Needs (CD Needs Statements) and Community Board Budget Requests (Budget Requests) are Charter mandates that form an integral part of the City's budget process. Together, they are intended to support communities in their ongoing consultations with city agencies, elected officials and other key stakeholders and influence more informed decision making on a broad range of local planning and budget priorities. This report also provides a valuable public resource for neighborhood planning and research purposes, and may be used by a variety of audiences seeking information about New York City's diverse communities.

For each policy area, community boards selected the most important issue for their districts and could provide a supporting narrative. The policy area section also includes any agency-specific needs and a list of relevant budget requests submitted by the community board. If the community board submitted additional information outside of a specific policy area, it may be found in Section 6.

### 3. Community Board Budget Requests

The final section includes the two types of budget requests submitted to the City for the FY22 budget cycle; one list for capital and another for expense budget requests. #### Community District Needs Related to Transportation and Mobility

##### **Needs for Traffic and Transportation Infrastructure**

Community Board 9 has the largest district in The Bronx with nearly 200,000 residents and geographically 5 square miles. The most congested corridor, the Cross Bronx Expressway is located in our CB. In Addition, other major arteries such as the Sheridan Expressway, Bruckner Expressway, Bronx River Parkway and Hutch Parkway contribute to thousands of vehicles utilizing our district, thus effecting our traffic and transportation infrastructure.

##### **Needs for Transit Services**

Bronx Community Board 9 residents rely heavily on public transportation, and providing high-quality transit services will connect residents with needed opportunities. According to the 2013 5-year American Community Survey, 62.3% of CB9 residents primarily use public transit services to get to work. This is higher than the city average of 55.9%. Additionally, the commute time for the working population is longer than the city average, 44.7 minutes compared to 39.2. At the same time, CB9 faces higher poverty and unemployment rates compared to the city as a whole. The poverty rate in the district is 28.4% compared to the city average of 20.3%. The unemployment rate is 13.5% compared to the city average of 10.6%. To address this discrepancy, better transit services are needed to connect residents with job opportunities both within and outside of the district. Finally, better transit services are needed to serve residents with disabilities. 11.9% of the district's population has a disability, compared to 10.3% in NYC, and many of these residents may rely on public transportation for commutes and other traveling needs. Combined with the senior population and those approaching senior status, there is a significant portion of the population that requires high-quality transit service to meet basic needs.
