Letter from DCP Director Daniel Garodnick

To my fellow New Yorkers:

Every year, each of New York City's 59 community boards advocate for the needs of its residents and stakeholders by preparing a Statement of Community District (CD) Needs and Community Board Budget Requests. Through this process, community boards share the top issues impacting their neighborhoods and propose capital and expense requests to address those identified needs. I'd like to thank the volunteer members of our community boards and the District Managers who work so hard in leading this essential process and in preparing these reports.

The annual CD Needs process is the product of months of collaboration and public input and is a valuable tool for New Yorkers to participate in neighborhood planning. At the broadest levels, CD Needs offers a critical window into the challenges faced by New Yorkers, and how those challenges may differ across neighborhoods. At a granular level, it provides a forum through which community leaders specify those needs and make recommendations for spending -- which in turn are used by City agencies, elected officials, advocacy groups, and non-profit service providers, among others, to better understand and meet the individual needs of each community board.

Through this year's submissions, we heard the stories of our communities' biggest challenges, such as the human impacts of our housing crisis. In that vein, community boards again selected affordable housing as the most pressing issue citywide, followed by crime and public safety, and parks and open space. Through our online form, community boards generated more than 3,700 budget requests, and for each, one of 28 City agencies responded to indicate whether the request could be accommodated within the upcoming annual budget. This year, in line with our commitment to increasing transparency across the CD Needs process, we are publishing agency responses to these requests in the final section of these reports.

DCP deeply values our partnership with community boards. We remain committed to supporting them by increasing participation in, and improving the transparency of, the CD Needs process. We have received valuable feedback from our community board partners, and we are excited to work with them to continue improving our online submission form, to connect boards with agencies to advance budget request proposals, and to open the form earlier in the calendar year to allow more time for public input and preparation. We look forward to advancing this work with both community boards and City agencies to ensure this is a valuable and productive way to improve our City's neighborhoods and to respond to local community needs.

Sincerely,

INTRODUCTION

The annual Statements of Community District Needs (CD Needs Statements) and Community Board Budget Requests (Budget Requests) are Charter mandates that form an integral part of the City's budget process. Together, they are intended to support communities in their ongoing consultations with city agencies, elected officials and other key stakeholders and influence more informed decision making on a broad range of local planning and budget priorities. This report also provides a valuable public resource for neighborhood planning and research purposes, and may be used by a variety of audiences seeking information about New York City's diverse communities.

HOW TO USE THIS REPORT

This report represents the Statement of Community District Needs and Community Board Budget Requests for Fiscal Year (FY) 2024. This report contains the formatted but otherwise unedited content provided by the community board, collected through an online form available to community boards from July to November, 2022.

Community boards may provide substantive supplemental information together with their Statements and Budget Requests. This supporting material can be accessed by clicking on the links provided in the document or by copying and pasting them into a web browser, such as Chrome, Safari or Firefox.

This report is broadly structured as follows:

1. Overarching Community District Needs

Sections 1 – 4 provide an overview of the community district and the top three pressing issues affecting this district overall as identified by the community board. Any narrative provided by the board supporting their selection of their top three pressing issues is included.

2. Policy Area-Specific District Needs

Section 5 is organized by seven distinct policy areas aligned with the service and program areas of city agencies. For each policy area, community boards selected the most important issue for their districts and could provide a supporting narrative. The policy area section also includes any agency-specific needs and a list of relevant budget requests submitted by the community board. If the community board submitted additional information outside of a specific policy area, it may be found in Section 6.

3. Community Board Budget Requests

The final section includes the two types of budget requests submitted to the City for the FY24 budget cycle; one list for capital and another for expense budget requests. For each budget request, community boards were able to provide a priority number, explanation, location, and supporters. OMB remains the definitive source on budget requests submitted to city agencies.

Disclaimer

This report represents the Statements of Community District Needs and Community Board Budget Requests of this Community District for Fiscal Year 2024. This report contains the formatted but otherwise unedited content provided by the community board.

Budget Requests: Listed for informational purposes only. OMB remains the definitive source on budget requests and budget request responses.

Budget Priorities: Priority numbers apply to expense and capital Budget requests from all policy areas. A complete list of expense and capital budget requests by this Board sorted by priority can be found in Section 7 of this document.

Supporting Materials: Some community boards provided substantive supplemental information. This supportive material can be accessed by clicking on the links provided in the document or by copying and pasting the links provided in the Appendix into a browser.

Statement on Data Accuracy

Under Title 13 of the U.S. Code, the Census Bureau is legally bound to protect the privacy of individuals participating in the decennial census. To adhere to the law and to avoid the disclosure of information about individual respondents, the Census Bureau has historically applied a host of techniques, such as top- and bottom-coding, imputation, table- and cell-suppression, and data swapping. The Census Bureau is employing a new technique with the 2020 Census, referred to as the Disclosure Avoidance System (DAS), based on differential privacy. With this approach, the Census Bureau “infuses noise” systematically across census data and sets a quantified disclosure risk, referred to as the Privacy Loss Budget (PLB).

While the new DAS approach may diminish the risk of disclosure concerns, it comes at a cost to data accuracy. Consequently, 2020 Census data users should be aware that all sub-state counts, except for housing units (which are unaffected by the DAS), may be adjusted to protect the privacy of Census participants and may be subject to reduced accuracy. Because DAS noise infusion is randomized, it is impossible for data users to know the degree to which any individual statistic is altered. However, it is possible to say that in general the relative size of errors decreases as counts increase. Consequently, data users should have greater confidence in the accuracy of the data as counts get larger. Further, an evaluation of a Privacy-Protected Microdata File (PPMF), treated with a Disclosure Avoidance System like the one applied to 2020 redistricting data, showed that counts of 300 or more rarely have sizable errors (error beyond +/- 10% of the count). Therefore, while data users need to be cognizant of data accuracy limitations, they should have confidence in conclusions based on sizable counts, which are relatively unaffected by the Census Bureau’s latest disclosure avoidance method.

3. OVERVIEW OF COMMUNITY DISTRICT

Manhattan Community Board No. 9 is made up of several distinct neighborhoods, Hamilton Heights, Manhattanville, Morningside Heights and a portion of Central Harlem. Our district runs from 110th Street to 155th Street. Our Eastern border runs along Manhattan/Morningside Aves, St. Nicholas/Edgecombe and Bradhurst Aves and the Hudson River is our western border. Each neighborhood is a distinct community, but all face growing challenges of housing affordability, increased homelessness, and a lack of youth development and employment opportunities. The biggest issue facing our neighborhood is affordability, particularly the rapid loss of previously-existing rent-stabilized apartments that are affordable to our largely lower-income and working class community. The coronavirus has taken a heavy toll on our community both in terms of cases and deaths, in the economic devastation from businesses closed and jobs lost, and in terms of education interrupted by remote learning that remained inaccessible to many families lacking digital connections or tech skills to troubleshoot issues. Because the demographics of our neighborhoods include many intersections of vulnerable populations (frontline workers, low-income, heavily Black and Latino, many seniors, and high rates of pre-existing conditions like heart disease), our neighborhoods continue to require sustained and aggressive programming for vaccination, testing and tracing, PPE distribution, and anti-hunger initiatives. After being ignored by the City in the initial vaccination rollout in the winter and spring of 2021 (with no City-run vaccination sites in our district until City College was selected at the end of March), our vaccination rates in fall 2022 continue to lag those of Manhattan and the city as a whole. ZIP code 10027 has only 73.4% of the population having completed a primary vaccination series while 10031 has only 73.2%, compared with a 79.9% fully vaccinated rate citywide and a 85% fully vaccinated rate in Manhattan. General Grant Houses had the most deaths of any NYCHA development in the city during the first wave of cases this spring, and Manhattanville Houses had a similarly high death toll during the second wave in the fall and winter of 2020. Even prior to the pandemic, our neighborhoods' poverty rate of 24.1% was significantly higher than the city's overall rate of 17.2%, with poverty concentrated among both families with young children (31.4% of whom were in households below the poverty line) and the elderly (26.7% of whom lived below the poverty line). Even when looking at a cutoff of 200% of the federal poverty line, our neighborhoods collectively had 43.3% of households below that limit compared to the citywide rate of 34.6%. Due to the concentration of residents who held service jobs in the hospitality industry (cooks, servers, bartenders, hotel and facilities workers) and employment in the arts collectively making up 15.8% of the population as of 2018 compared to the citywide average of 10.2%, unemployment in our ZIP codes soared, hitting 17.69% in 10031, 19.31% in 10027, and 6.68% in 10025 (shared with MCD7), before returning to lower levels (though still elevated above the NYC average) this year. And as work, school, and social life began "going remote," families and individuals in our community were at a disadvantage, with 7.1% of households only having internet on their cellular devices and 13.7% of households lacking an internet connection entirely as of 2019 ACS data. In order to recover from the pandemic, our neighborhood will require sustained support for our most vulnerable, including but not limited to the following interventions:

- Income assistance
- Job placement and training workforce development, particularly in high-growth fields not requiring a college degree like the construction trades, life sciences, and skilled building maintenance
- Subsidized or free internet connections
- Digital literacy programs
- Small business support
- Assistance to renters
- Assistance to homeowners, especially with repairs and capital expenses as well as lower interest rates and more flexible plans for water/sewage arrears and property tax arrears.

Immediate expenditures by agencies, aside from rent assistance, include further technological assistance to families in DOE schools who have difficulty participating in remote learning, an expansion of the Cure Violence program to cover the southern portion of Hamilton Heights where there has been an alarming escalation in the number of shootings, increased resources for homelessness outreach and services, especially around Montefiore Park on Broadway and W 136th to W 138th Streets, and expansion of regular DSNY curb basket collection and education and enforcement to help control pest populations. All of these are included in our budget priorities. Longer-term trends continue to threaten our vibrancy as a diverse, mixed-income community. From 2000 to 2019, the Black population of MCD9 declined from 29.1% to 15.2%; the Hispanic population of MCD9 declined from 42.7% to 37%; and the white population of MCD9 grew from 20.3% to 35.7%. During the same timeframe, households earning less

than \$60,000 annually declined from 59.4% to 51.6%; households earning between \$60,000 to \$250,000 grew from 36.6% to 41.1%; and households earning more than \$250,000 grew from 4% to 7.4%. These trends, accompanied by persistently high eviction rates and a rise in the percentage of rent-burdened households, were caused by aggressive gentrification marked by residential and commercial displacement of working-class and low-income households in favor of younger, whiter, more highly-educated and higher-income, but more transient students and recent postsecondary graduates. While we expect the improved 2019 rent regulations and the expansion of the Right to Counsel law to slow the rate of residential displacement, additional resources for proactive tenant legal representation and organizing are necessary to stabilize the neighborhood and protect our economic and racial diversity. This has become increasingly more important as Right to Counsel legal services providers are at maximum capacity and are turning away clients as of 2022.

The several neighborhoods within our West Harlem boundaries face unique circumstances, even as they largely share similar challenges. Morningside Heights in the southern portion of the Board contains many of the area's numerous institutions: Cathedral Church of St. John the Divine, Bank Street College of Education, Columbia University, Barnard College, Teacher's College, Manhattan School of Music, Union Theological Seminary, Jewish Theological Seminary, The National Council of Churches, Riverside Church, Grotto of Notre Dame, and the Mount Sinai St. Luke's Hospital Center. Morningside Heights itself is an extremely diverse area and is anchored at the northern end by the General Grant Houses NYCHA development and the former limited-equity cooperative Morningside Gardens. Real estate in Morningside Heights is overwhelmingly owned by the aforementioned institutions, with the remaining parcels generally belonging to private co-ops, with a small cluster of rent-stabilized, non-institutionally-owned rental buildings in the northwest area of the neighborhood around Tiemann Place, La Salle Street, and Claremont Avenue. Morningside Heights has recently been the site of battles fought with institutions selling property to developers who then build luxury condominium or rental towers "as of right" that are out of context with no height limits under current zoning. A grassroots movement has erupted to complete the over thirty year old battle to undertake a study to rezone the area of Morningside Heights and put limits on the height and context of buildings in this portion of the district. To the north of Morningside Heights is Manhattanville, which begins at roughly 123rd Street and extends northward to 135th Street. This area includes the south campus of the City College, part of the City University of New York; the Manhattanville Houses NYCHA development; Riverside Park Community Housing at 3333 Broadway, (a former Mitchell-Lama rental building), and a number of small commercial establishments. Manhattanville is also the site of Columbia University's new campus, which is currently under construction in an area formerly inhabited by light manufacturing businesses that served as a middle-class employment base for many working families in the area. The departure of those manufacturing jobs has left the district with a dearth of stable jobs with decent pay that do not require a college degree. Manhattanville is also home to the District's largest concentration of non-institutional commercial office space in the Manhattanville Factory District, comprising an area east of Amsterdam Avenue and west of Convent Avenue between W 125th and W 130th Streets. The northernmost section of Community Board No. 9 is comprised of Hamilton Heights (which includes the "Hamilton Heights/Sugar Hill Historic District". Hamilton Heights is home to a substantial number of owner-occupied brownstones and also includes the Audubon Houses NYCHA development, Riverview Tower/626 Riverside Drive (a Mitchell-Lama co-operative), and the largest number of Housing Development Fund Cooperatives (limited-income cooperatives where purchasers must make under a certain amount of income per year at the time they buy the apartment) in the city. There are very few vacant structures or lots. The majority of the small businesses in this area are operated by a diverse group, including Hispanic/Latino, Middle Eastern, Caribbean, and Asian owner/operators. Hamilton Heights is also home to the North River Pollution Control Plant with the Riverbank State Park on its roof. Hamilton Heights and Manhattanville also abut St. Nicholas Park, the site of the Alexander Hamilton House. The unique topography and history of these areas, partially separated from the rest of Upper Manhattan by a series of bluffs on its eastern end (Jackie Robinson Park, St. Nicholas Park, and Morningside Park) helps to create an eclectic and historic area with its own distinct character. The topography and our adjacency to the Hudson River means that we are blessed with a series of parks that serve as collective outdoor living rooms, play spaces, athletic facilities, and gathering places that have helped enormously during the pandemic. Their maintenance in a state of good repair is a critical priority for our community, but several, especially St. Nicholas Park, require extensive reconstruction of their pathways. We are proud of our neighborhoods and are committed to maintaining them and ensuring that our neighbors will be afforded an excellent quality of life.

4. TOP THREE PRESSING ISSUES OVERALL

Manhattan Community Board 9

The three most pressing issues facing this Community Board are:

Affordable housing

The need for affordable housing has become a major problem for low, medium and middle-income families. A significant portion of Manhattan Community Board No. 9 (MCB9) renter households is under a financial burden to pay rent. Technically, this includes households who have to use 30% or more of their income towards rent. In 2017, 25% of all CB9 households were “moderately rent-burdened”, paying 30% or more of their income towards rent. Even worse, an additional 30% of CB9 households are “Severely rent-burdened”, paying 50% of their income on rent. Among our low-income population this number increases to 48% of households. In total, 55% of households in CB9 are severely or moderately rent-burdened. As a result of the expiration of public subsidy contracts for affordable housing and rapid private development of the few remaining soft sites in the district, long-term residents of public and rent-regulated and subsidized housing face the threat of displacement. Riverside Park Community is a recent example of a lost Mitchell Lama property with over 2,000 apartments we encourage the City to take all steps necessary to protect NYCHA, HPD, and Mitchell-Lama properties from privatization. The privatization of the properties would render many residents homeless. Capital funding for repairs at Audubon and Manhattanville Houses is currently envisioned to occur through RAD/PACT. Community Board 9 has serious concerns about the long-term impact of these programs on tenants' stability and their apartments' habitability, and close monitoring of contractors and communication with residents will be essential to ensuring that the proper scope of work for these developments is selected and the true extent of necessary repairs is understood and fully funded. MCB9 is also home to many buildings still in the Tenant Interim Lease program. Tenants in these City-owned buildings gave up their rent regulated leases in exchange for a commitment from the city to repair the buildings and sell the apartments to the tenants for \$250. The City must fulfill its commitment to these tenants by repairing and restoring these buildings to habitability and then allowing the tenants to become shareholders without having the building shoulder an enormous debt burden, as is the case with the Affordable Neighborhood Cooperative Program (which requires millions of dollars of debt be attached to the newly-formed HDFC Co-op). Fully funding repairs and co-op conversions in TIL buildings and former TIL buildings without leaving the resulting co-ops with loans is a top priority that will require the restoration of City capital funds to a dedicated TIL program budget line. Additional investments in low-income housing, especially supportive housing for the formerly homeless (with a local preference for those formerly housed in Manhattan Community District 9) is also desperately needed. Finally, additional enforcement of housing code violations in landlord-owned rental buildings and tenant education will be crucial to addressing affordable housing and habitability issues. There are currently 11,020 open Class C (Immediately Hazardous) Housing Maintenance Code violations open in MCD9, and over 27,458 Class B (Hazardous) violations open in MCD9. These are some of the highest rates in the city, and contain numerous issues with mold, lead paint and dust, mice and other vermin infestations, and fire hazards. The Tenant Protection Unit and HPD Enforcement both should increase activity in the district using 311 data and DOB violation data. Additional enforcement actions must also be undertaken to crack down on landlords who are increasingly seeking to illegally rent out individual rooms as either short-term (frequently through AirBnB) or long-term rentals, in what should be rent-stabilized apartments, functionally creating illegal SROs.

Health care services

Manhattan Community District 9 faces a multitude of increased risk factors relative to the rest of the city that require increased health interventions. Air quality is relatively poor, especially in the Manhattanville area, due to high concentrations of building boilers, industrial and commercial buildings, and truck traffic, with elevated level of nitrogen dioxide and PM 2.5 (8.0 in MCD9 vs. 7.5 citywide). Fewer households in MCD9 have air conditioning (86% compared to 89% citywide), with more relying on open windows for circulation and cooling during the summer. Our maternal care and infant mortality rates are a cause for special concern, with 11% of delivering mothers in MCD9 having late or no prenatal care (compared to 6.7% citywide) and an infant mortality rate of 4.5 per 1,000 live births, roughly that of Serbia. Childhood obesity rates of 25% are also elevated relative to citywide rates of 20%, and ER

visits for childhood asthma emergencies are at 333 per 10,000, over a third higher than the citywide rate of 223 per 10,000. Significantly higher rates of diabetes (10%) and hypertension (29%) also lead to significantly higher rates of stroke and cardiac events 31.7% of premature deaths. High rates of psychiatric hospitalization (726 per 100,000 adults) are likely due to greater stressors and less access to preventative care. MCD9 also has 34.1 new HIV diagnoses per 100,000 people, a third higher than the citywide average, suggesting greater interventions in intravenous drug using populations and more access to treatment as prevention strategies are needed. Significant interventions are needed to educate community members about nutrition, diabetes care, smoking cessation, and asthma care. More air quality monitoring and community and school exercise programming is needed. Increased investments in chronic disease management, including free or low-cost access to medication and care, is required. The Manhattanville Health Station at 21 Old Broadway should be utilized as a hub for these services.

Schools

One of the biggest issues in MCD9 is school overcrowding and poor school facilities, despite what the Blue Book may say about particular school districts. Manhattan Community District 9 contains 29 K-12 school facilities, both public and private, although this is expected to drop to 28 with the closure of Corpus Christi school. Educational attainment in the district is highly unequal, with higher rates of both those having graduate degrees (22%) and bachelor's degrees (21.9%) than the citywide averages, but also higher rates of those having less than a 9th grade education (11%) and having left school between 9th and 12th grades (9%). Our schools have higher languages of English Language Learners than citywide and many are Title I schools with some having over 85% economic need index according to DOE data. Our reading proficiency levels are routinely below 40%. Chronic absenteeism is significantly higher in MCD9 (27%, compared to 20% citywide), graduation rates stand at only 65% vs. 75% citywide, and many families have members incarcerated, with our rate of incarceration at 633 per 100,000, compared to 425 per 100,000 citywide. The growing number of disengaged youth who are not in after-school enrichment or employment programs have led to a notable increase in recruitment of young teens (13-15) into gangs and drug dealing, particularly in the southern area of Hamilton Heights (135th to 140th Streets). With many school operating at least partially remotely, the increase in disconnected youth has risen even more. More interventions and programs assisting young people with issues including mental health, social and skills development, and mentorship are needed. Additionally, a Cure Violence program expansion into said area of Hamilton Heights is also required to help intervene in and prevent additional shooting incidents, which have skyrocketed over the past 2 years. MS 371 SEED school (05M371), PS/MS 129 John Finley School (05M129), and others are asking the DOE for technology improvements so that students can meet the demands of the twenty-first century. Curriculums include STEM (science, technology, engineering, and mathematics), but schools lack the tools to implement these programs. Technology can be used to support and enhance student's other academic studies such as Art, Science Exploration, Math Illustration and more. The worldwide industry trends require computer literacy. It is essential that schools have the technology infrastructure, including high-speed internet bandwidth, to support laptop/tablet use in classrooms. The DOE has an obligation to provide students with a skillset that will allow for entrance into higher education and into the job market. This also requires the DOE to provide and staff additional IT personnel to regularly update computers and computer accessories. Additionally, we ask the DOE to provide space for teachers and parents to learn basic computer skills. Schools have the capacity to host after-school or preschool computer lessons so that the adults in our students' lives have basic computer literacy. Learning continues at home, and parents need to be able to help their children navigate Google classroom, IXL or any other programs their students may be using at the end of their school day. MCB9 needs adequate wireless Internet and computer technology access in schools and in students' homes which will increase diversity and support our most vulnerable students. While NYC has taken steps by providing complimentary wifi with the LinkNYC stands; we ask that the NYC Office of Technology and Innovation (NYC OTI) take it a step further by providing wireless routers and establishing city wide internet access. The New York Public Library (NYPL) can assist with accomplishing this by having adequate hours and staffing. We request funds to continue to extend access to the New York Public Library (NYPL) branches in the community. For in-person Access: six-day service including increased hours, programming, collections, and sufficient staff to support these functions. For remote access: increasing the number of available Wi-Fi hotspots available across our West Harlem library branches for community members to borrow. These will provide greater access to digital library content, as well as other critical digital resources, collections, and sufficient staff to support these functions. Public Libraries provide our community with substantial educational support, not only for current K-12 students but also for parents, families with young children, English language learners, job seekers, and more.

Libraries provide access to reading material, technology equipment, and educational programs (homework help, literacy programs, etc.). Libraries also provide a safe space for children to gather after school, where they can study, play computer games together and relax. Finally, in addition to a need for wraparound school-based services and technology upgrades, the absolutely most pressing issue facing education in CB9 is the severe overcrowding in certain schools, most notably at 433 W 123rd Street/425 W 123rd Street, which houses PS 125 (Ralph Bunche), M362 (Columbia Secondary School for Math, Science, and Engineering, or "CSS"), and a Kipp STAR College Prep Charter School. These 3 schools are colocated in a building originally developed for elementary school children, but cover children ages 4 years old through 19 years old. The facility unlawfully lacks library services, has IEP activities conducted in closets, children changing for gym in stairwells, and inadequate cafeteria facilities that means children are eating lunch in shifts from 10am through 3pm. This is completely unacceptable, and the inane response we routinely receive when we raise the issue, that "District 5 does not have an assessed need for additional capacity at this time," does not address the unlawfully crowded and inadequate conditions for these schools. The current situation opens the City and the DOE up to unacceptable risk of litigation and must be met with plans and funding to expand the physical facilities available to these schools.

5. SUMMARY OF COMMUNITY DISTRICT NEEDS AND BUDGET REQUESTS

HEALTH CARE AND HUMAN SERVICES

Manhattan Community Board 9

Most Important Issue Related to Health Care and Human Services

Environmental health issues (noise, lead, respiratory illness, moisture, mildew, mold, etc.)

Tenants in Manhattan Community Board 9 rental buildings and NYCHA developments continue to face health threats from lead dust and mold that are not properly abated. Local nonprofits like WEACT for Environmental Justice and P.A.'L.A.N.T.E. Harlem are working with various buildings to organize tenants to file complaints with DOHMH, HPD, and DOB, but comprehensive testing and housing code enforcement, coupled with robust tenant rights advocacy are needed. There are close to 1100 open HPD violations for mold violations alone, and several hundred open violations for lead to be abated. These conditions both contribute to our community's high rates of asthma and can exacerbate the severity of the condition or trigger asthma attacks. The presence of lead can permanently damage a young child's mental and emotional development, and can contribute to hypertension and kidney damage in adults.

Community District Needs Related to Health Care and Human Services

Needs for Health Care and Facilities

New York City Department of Health launched TAKE CARE NEW YORK 2020 which provides a health profile for every community board in New York City. As a result, the community boards have a statistically driven idea of what our health issues are in comparison to the rest of the city. MANHATTAN COMMUNITY BOARD 9 (MCB9) ranked 10th in the City for people who are returning home from incarceration. MCB9 ranked in the top twenty-five percent for people who suffer from diabetes and obesity, ranked third in the city for people who needed Medical Care but went without. MCB9 currently has the highest childhood asthma rate in NYC as a whole and Manhattan. Solutions: Fund Reentry programs that have a holistic approach to assist people returning into the community; Fund programs geared toward obesity prevention by reaching out to community groups with programs; Fund outreach to people who have no insurance by going to unemployment offices, welfare offices, and food drives; Fund outreach to schools to provide asthma education training to caregivers in the school; MCB9 has a deficit of health care providers within the community. There needs to be more community-based providers and primary care physicians, MCB9 currently has very few; with Mt. Sinai West being the only Hospital in our district. There should be funding for health care offices on the street level that is accessible to everyone, those with insurance and without. MCB9 is in need of having the Manhattanville Health Station reopened at full capacity. For almost a decade, Manhattanville Health Station remains closed and there has been no clear plan presented as to when we can expect to see the center rehabilitated. Programs originally on site have been relocated to other facilities and areas leaving a major gap in services for this area. Manhattan Community District 9 faces a multitude of increased risk factors relative to the rest of the city that require increased health interventions. Air quality is relatively poor, especially in the Manhattanville area, due to high concentrations of building boilers, industrial and commercial buildings, and truck traffic, with elevated level of nitrogen dioxide and PM 2.5 (8.0 in MCD9 vs. 7.5 citywide). Fewer households in MCD9 have air conditioning (86% compared to 89% citywide), with more relying on open windows for circulation and cooling during the summer. Our maternal care and infant mortality rates are a cause for special concern, with 11% of delivering mothers in MCD9 having late or no prenatal care (compared to 6.7% citywide) and an infant mortality rate of 4.5 per 1,000 live births, roughly that of Serbia. Childhood obesity rates of 25% are also elevated relative to citywide rates of 20%, and ER visits for childhood asthma emergencies are at 333 per 10,000, over a third higher than the citywide rate of 223 per 10,000. Significantly higher rates of diabetes (10%) and hypertension (29%) also lead to significantly higher rates of stroke and cardiac events 31.7% of premature deaths. High rates of psychiatric hospitalization (726 per 100,000 adults) are likely due to greater stressors and less access to preventative care. MCD9 also has 34.1 new HIV diagnoses per 100,000 people, a third higher than the citywide average, suggesting greater interventions in intravenous drug using populations and more access to treatment as prevention strategies

are needed. Significant interventions are needed to educate community members about nutrition, diabetes care, smoking cessation, and asthma care. More air quality monitoring and community and school exercise programming is needed.

Needs for Older NYs

2020 has taught us that our greatest weakness when it comes to meeting the needs of seniors is communication. Our committee was able to meet throughout the year, notwithstanding the shutdown, but our main means of communication was by phone, mail or in person. We discovered that the Department for the Aging only has access to the contact information for seniors who are members of a city-run Senior Center, limiting its ability to reach seniors in need. Our experience has shown that a number of our agencies still do not recognize the need for alternative means of communicating with seniors. Communications come in the form of flyers with zoom links, websites and emails, failing to include a phone number for phone-accessible information. During the citywide shutdown, seniors were not receiving up-to-date information about where to get vaccinated, where to get food, or how to receive other forms of assistance, unless they were signed up at their local senior center or otherwise actively engaged through the Community Board or another organization. Our committee sees communication as a gateway to improving many other aspects of seniors' lives. When seniors are empowered to communicate their needs, they will be able to address everything from health to transportation, arts to accessibility. And experience shows us that when things improve for seniors, they improve for every member of society. Given that the amount of funding the Department for the Aging has received from the city has historically been less than half of a percentage of the City's budget (<https://local.aarp.org/news/aarp-commends-nyc-council-mayor-for-increased-funding-for-aging-services-in-fy22-calls-for-longterm-future-investment-ny-2021-07-01.html>) we applaud the city and our Mayor for making the largest investments in DFTA's budget to date and restoring almost all the City Council's Senior Service initiatives to pre-pandemic funding levels. Seniors now represent roughly 20% of the city's population as a whole and they deserve a greater share of the budget. However, the gaps in communication between city agencies and seniors will not be addressed with this funding alone. Therefore, we recommend the following: 1. \$6,000,000 dedicated to the purchase and distribution of tablets to all seniors. During the pandemic, the city spent almost 300 million dollars in order to provide schoolchildren with tablets so that they could continue to attend school virtually. Schoolchildren represent less than 20% of the city's population. 2. \$6,000,000 dedicated to technology training for seniors. Most seniors will need help learning how to use this new technology so it is essential that we pair training and technology 3. \$1,000,000 annually, dedicated to training staff at all agencies on how to communicate with seniors. Agencies continue to communicate using modes that are only accessible via the internet through the use of a computer or smartphone. We must change the culture within our agencies so that seniors' needs are always taken into account. In addition, long-range comprehensive planning must include housing, health and mental care, home care and senior centers. Therefore, we request \$6,000,000 to support outreach to the homebound. \$100,000,000 to develop 200 new units of affordable housing for seniors.

Needs for Homeless

Manhattan Community District 9 has seen an enormous rise in homelessness through tenant eviction and a lack of affordable housing, with two of the highest ZIP codes for evictions in the city (10027 and 10031). From 2017 through 2019, MCD9 saw 524 evictions, or 1 eviction for each 85.5 housing units, among the highest in the City. MCD9 has also seen a massive rise in street homelessness in 2020, with 311 reports of homeless individuals tripling from 2018 to 2020. More outreach staffing to allow daily outreach in hotspots around Montefiore Park, Jacob Schiff Park, Broadway in Morningside Heights, Convent Avenue and 126th/127th Streets east of Amsterdam Avenue, and Riverside Park in Hamilton Heights is needed. Additionally, more targeted outreach to get individuals experiencing homelessness with concurrent mental health and substance abuse disorders into appropriate treatment is necessary.

Needs for Low Income NYs

Many of the issues faced by low-income residents in CB9 are issues that overlap with other areas like housing, education, childcare, and senior services. The dilapidated state of Manhattanville Houses, Grant Houses, and Audubon Houses, as with most NYCHA housing stock, contributes to environmental and health issues among many low-income residents. A lack of affordable childcare slots also makes it difficult for low-income families to advance economically. One particular issue that has become incredibly prominent during the pandemic and will continue to grow in importance as inflation raises prices on the grocery store shelves is food insecurity. Map the Meal Gap

shows food insecurity in our area was elevated even prior to the pandemic at ~17% of households being food insecure. Continued efforts to stock local pantries and work with local community based organizations like churches and housing rights organizations is critical to helping fill that gap, along with increased meals programs at schools and senior centers.

Capital Requests Related to Health Care and Human Services

Priority	Agency	Request	Explanation	Location
10/57	DHS	Other capital budget request for DHS	<i>Provide funds for acquisition and reconstruction of Ellington Hotel at 610 West 111th Street as potential SGL/LGBTQ housing, especially for homeless youth and seniors.</i>	610 West 111 Street, Manhattan, New York, NY
25/57	DFTA	Renovate or upgrade a senior center	<i>Provide funds to repair Hamilton Grange Senior Center damaged by flooding during Hurricane Ida, including kitchen renovation (with new freezer, stove, counters, and working sink), repair of floors, and replacement of boiler</i>	420 West 145th Street, Manhattan, New York, NY
30/57	DFTA	Renovate or upgrade a senior center	<i>Provide funds to replace the non-working elevator with an ADA-compliant elevator at the Jackie Robinson Senior Center at 1302 Amsterdam Avenue. The center is both a senior center and a designated cooling center during summer months. Its elevator is not currently operational.</i>	
CS	DFTA	Other capital budget request for DFTA	<i>Allocate funding for WiFi and tablet/laptops for low-income seniors isolated by the COVID-19 pandemic and the digital divide in New York</i>	

Expense Requests Related to Health Care and Human Services

Priority	Agency	Request	Explanation	Location
7/51	DHS	Expand street outreach	<i>Increase funding for dedicated outreach personnel for consistent relationship building outreach to homeless in CD9, particularly with enough staffing capacity to conduct daily outreach at hotspots in 3 block radius around Montefiore Park on W 137th Street and Broadway.</i>	

13/51	DOHMH	Other programs to address public health issues requests	<i>Provide funds to increase reach of infant mortality reduction initiatives. Despite a decrease in infant mortality across the city, the rate in Morningside Heights, Manhattanville, and Hamilton Heights is still almost five times higher than the rate in the Upper East Side. We think this is due to our high rate of poverty, lack of adequate parents in good health Our community as a high rate of poverty (food insecurity, lack of access to health insurance, unhealthy housing, joblessness) as well as strokes, diabetes and asthma and individuals returning to community post incarceration.</i>
16/51	DFTA	Other expense budget request for DFTA	<i>Allocate funding for WiFi and tablet/laptops for low-income seniors isolated by the COVID-19 pandemic and the digital divide in New York</i>
22/51	DOHMH	Other programs to address public health issues requests	<i>Fund a continuation of and more frequent data collection for the New York City Community Air Survey. Data is currently only available through 2018 and gathered during a two-week period each quarter. DOHMH should invest in continuous air quality monitoring to better capture real-time air quality shifts and conditions. The current combination of NYCCAS, 311, and 911 calls is not working to capture immediate violations. We have a very high rate of asthma and need during times of COVID all respiratory triggers in our community. We need a separate reporting system for Riverbank. 311 calls are insufficient for tracking real-time air quality problems and events.</i>
29/51	DOHMH	Animal and pest control requests including reducing rat and mosquito populations	<i>Increase funds for Pest Control to reduce mosquito, rat, bedbug, and other pest populations within CD9.</i>
31/51	DOHMH	Other programs to address public health issues requests	<i>Expand lead testing efforts to test every child in NYCHA developments and children in buildings identified by HPD and DOB as poorly-maintained or likely to contain lead paint or other lead dust based on age, violations, and other data.</i>

36/51	DFTA	Other expense budget request for DFTA	<i>Provide funds to repair Hamilton Grange Senior Center damaged by flooding during Hurricane Ida, including kitchen renovation (with new freezer, stove, counters, and working sink), repair of floors, and replacement of boiler</i>
37/51	DFTA	Other expense budget request for DFTA	<i>Provide funds for the renovation and repair of roof and interior of Wilson Major Morris Center</i>
44/51	DOHMH	Create or promote programs for education and awareness on preventing chronic diseases including quitting smoking, nutrition, physical activity, etc.	<i>Expand culturally-literate public education around stroke and other cardiac events like the Hip-Hop Stroke program at Harlem Hospital for audiences including African, Mexican, and Dominican communities. Heart disease is the leading cause of death in CB9 (943 deaths 2019) The rate of stroke hospitalizations in Morningside Heights and Hamilton Heights (364) is higher than both the Manhattan (264) and citywide rates (140)& High blood pressure being the leading risk factor for stroke.</i>

YOUTH, EDUCATION AND CHILD WELFARE

Manhattan Community Board 9

Most Important Issue Related to Youth, Education and Child Welfare

Community and/or home-based support services for families

In light of the pandemic, our Youth in Manhattan Community Board 9 - MCB9 is in need of support above all else. Food insecurity, mental health and academics are our chief concerns and must be addressed. MCB9's social service programs and community services are vital to our district residents, and we have seen many successful implementations of these programs physically located in school buildings. Social Service "wraparound" programs help both the students in our community and their family members to cope with the challenges they face in their daily lives. Our committee desires to have funds allocated for support services to better the lives of all citizens, such as English literacy courses; mental, dental, and eye health providers and job training and placement programs. MCB9 has a significant population of homeless students. Our community requests to have funds allocated to addressing the specific needs of homeless children: providing students with clothing, counseling, support services, etc. to help them cope with the stresses of being without a permanent home. The schools in our district have tremendous needs, predominantly among them are space allocation and technology requests. Furthermore, the impact that food and income scarcity have in our community is felt equally throughout the home and in the classroom. To this end, PS 161 - Pedro Albizu Campos School (05M161) has chiefly requested a school wide resource pantry to provide food and clothing for students and their families. Mental health needs have increased citywide since the pandemic. MCB9 requests that funds be allocated by the NYC Office of Mental Health (NYC OMH), as well as the DOE to provide mental health programming in schools. With the announcement of the DOE program Project Pivot, we believe that we are in alignment with education officials by requesting this be a permanent fixture of education. We are pleased to see the use of CBOs and ask that the city's Office of Mental Health also use these programs within their own city run agencies. If we want to address the issues that we see in our community, we cannot do so without addressing the mental health crisis. Social service programs are needed and require providing enough paraprofessionals citywide in schools (charter and public) to support students in their learning. Additionally social workers in schools provide safe spaces for our at-risk youth, LGBTQ students and alleviate further physical or emotional distress from our youth. If we can take these steps to support the whole of the child: social, emotional, mental, physical safety and nourishment - we can create a better future for our community, our city and its citizens.

Community District Needs Related to Youth, Education and Child Welfare

Needs for Youth Education

MCB9 is in need of adequate physical space for existing schools in light of the co-location of many DOE and charter schools in DOE buildings.

Each time an example of overcrowding is given, the blue book is heralded as confirming that there is more than enough space, creating a distinct difference between fiction and reality. Co-locations continue to pose academic, social, and physical difficulties, additionally they are hazardous and dangerous. The sheer volume of students in hallways at a given time, lack of proper changing areas for gym, and absurd lunch times are just a few reasons why the DOE has a requirement to visit schools in person and re-evaluate the space allocations. Many of these infractions are not just inconvenient, but unlawful as well.

Colocation limits the physical space that is available for schools to use for physical education and play space (gyms), arts programming (required arts curricula: music, dance, visual arts, theatre), and adequate provision of special education services as required by law. Relatedly, many buildings are serving a different age range than they were originally designed for, so facilities like desks and bathrooms are inappropriate for the physical needs of current students. We ask that the DOE provide a proper school location for School 05M362 (Columbia Secondary School, or "CSS") and PS 125 (Ralph Bunche School). Both schools state that more space would assist with learning above all else. Their space houses 4-year-olds up to 18 year-olds and is staggeringly inept to handle the physical challenges

that this presents. CSS is a high school currently co-located with TWO other schools, PS 125 and Kipp STAR College Prep, and has a myriad of physical building issues such as mold, inadequate changing space, inadequate eating areas. There are holes in the ceilings and raccoons and birds invading the school space – this puts our children’s lives in jeopardy. Furthermore - the school is not upholding the law in regards to having a separate, but safe space for IEP students to have private sessions, and to take exams. There should also be separate space for Sex Education discussions for High Schoolers. Students are in large closets for some activities and are subjected to health issues as the school does not have enough room for all students to eat lunch with adequate eating time. Children have to eat lunch at 10 am and continue lunch sessions until 3 pm without a break. The blue book is outdated and does not account for how to schedule students in such an environment where again, there are THREE separate schools using the space. This school houses students from Districts 3, 4, 5, and 6 and has been a marvel - however, the school cannot continue to operate crippled by the parameters of the blue book which does not take into consideration the different needs of elementary-aged children (from the other school in the building) being housed and educated with high school children. The student’s immediate needs are not being met adequately and we request a major part of the budget for the development of physical space for this school. We have continually asked that the DOE approve the agreed upon space that Columbia Secondary School was supposed to have from its inception and allow Ralph Bunche School to expand their potential with a special education coordinator, extracurricular activities, a music room and music teacher, Library for its students and full use of the gymnasium for sports, and exercise.

MCB9 also needs adequate wireless Internet and computer technology access in schools and in students’ homes, so that students can learn to use these important twenty-first-century tools and so that they can use them to support and enhance their other academic studies. Especially with curricular changes emphasizing STEM (science, technology, engineering, and mathematics) and computer science for all, it is essential that schools have the technology infrastructure, including high-speed internet bandwidth, to support laptop/tablet use in classrooms. It is important to have enough personnel to support all schools with installing, updating, and configuring these devices. MCB9 continues to be concerned about the possibility of the presence of lead in school water fountains. We are not satisfied with the city’s level of testing or communication with families about the extent of the problem or possible risks. We request funding for continued water testing and mitigation. In Addition having a special needs program, year-round, within the borderlines of MCB9 is crucial to the development of our community. The special needs population is significant and growing. Yet there aren’t many local programs out there. Most therapists and behavioral counselors only accept Medicaid or out of pocket payments. There is a growing number of working-class families that make too much to qualify for free programs or too little to afford specialty special needs care within MCB9. We request funds to continue to extend access to the New York Public Library (NYPL) branches in the community. For in-person Access: six-day service including increased hours, programming, collections, and sufficient staff to support these functions. For remote access: increasing the number of available Wi-Fi hotspots available across our West Harlem library branches for community members to borrow. These will provide greater access to digital library content, as well as other critical digital resources, collections, and sufficient staff to support these functions. We are also requesting that the DOE provide funding for the development of a culturally sensitive curriculum, for use within CD9 schools in cooperation with the Community Education Councils for Districts 5, and 6 recognizing the historical contributions of figures, movements, and more from a diverse set of communities within CD9, including African American, Caribbean, Latino, and LGBTQ communities. Most Important Issue Related to Public Safety and Emergency Services

Emergency service delivery (including rapid response)

Manhattan Community Board 9 is dealing with a disturbing increase in public drug use, vending of stolen goods, drug dealing, public urination/defecation, and mental health breakdowns on our streets. Expanded use of social workers, substance abuse counselors, and mental health specialists in emergency response services is needed to address these issues and convince those affected to enter into the appropriate treatment programs in a way that limits involvement of the criminal justice system. In particular, expansion of the B-HEARD program to be 24 hours a day instead of only from 9am to 1am, would be an improvement.

Community District Needs Related to Public Safety and Emergency Services

Needs for Public Safety

The Police Department has the Neighborhood Coordination Officers, or NCOs, who are our local problem solvers. They spend all their working hours within the confines of the 26th and 30th Precincts, assigned sectors, and actively engaging with local community members and residents. They get to know the neighborhood, its people, and its problems extremely well. The Neighborhood Coordination Officers (NCO) program is broken down in the following (3) units: Sectors A, B, and C

Needs for Emergency Services

Expansion of the B-HEARD response team that provides social workers/mental health specialists as emergency response services is needed in CB9 to remove the burden of responding to emotionally disturbed persons from the NYPD. The current system requiring police response to situations with EDPs raises the likelihood of a tragic outcome involving the loss of life.

CORE INFRASTRUCTURE, CITY SERVICES AND RESILIENCY

Manhattan Community Board 9

Most Important Issue Related to Core Infrastructure, City Services and Resiliency.

Air quality and pollution

The aforementioned high rates of NOx, PM 2.5, and asthma all drive negative health consequences throughout CB9. Ensuring that the North River Wastewater Treatment Plant is not contributing to the air quality conditions in the district will require continued investment in air quality monitoring. Funding for conversion of buses in the Manhattanville bus depot and Amsterdam bus depot to emission-free vehicles, as well as funding to incentivize conversion of fuel oil boilers to natural gas or electric boilers will be crucial to reducing particulate matter and other harmful chemical emissions in our area.

Community District Needs Related to Core Infrastructure, City Services and Resiliency.

Needs for Water, Sewers, and Environmental Protection

Manhattan Community Board 9 has several areas where stormwater runoff exceeds the capacity for existing drainage systems to handle the runoff. Particular sites include 12th Avenue and W 135th Street, W 145th Street and Broadway, and Convent Avenue and W 126th Street.

Needs for Sanitation Services

While most of the drastic Sanitation cutbacks were restored, this is not enough to improve the quality of life in our community. This is especially true north of West 125th Street. The staffing does not reflect the actual tonnage of garbage handled by Community Board 9 Sanitation Crews. Pick-ups along the Commercial Strips of Broadway, Amsterdam Avenue (W 135th – W 155th Streets), and 125th Street cannot keep up with utilization. We urge the City to increase staffing to facilitate three pickups per day in these locations. There is a need for more garbage cans due to the rat infestation. For Vacant Lots and trouble locations, we need the Clean Team Restored. Recycling figures have greatly improved. We need, if not increased, consistent Sanitation Enforcement in our area, MCB9 has recommended an increase of Enforcement Officers in the afternoon when violations are at their peak. MCB9 believes the health and integrity of our community MUST be a top priority.

HOUSING, ECONOMIC DEVELOPMENT AND LAND USE

Allocate funds for an existing conditions report on the City-owned site of the former 135th Street Marine Transfer Station to be included in an RFI (request for interest) for the purpose of moving forward with the development of the structure to serve the community. Supporting information: Request Report on the Marine Transfer Station to be included in an RFI (Request for Interest) for the purpose of moving forward with the development of the structure to serve the community. The goal would be to attract developers to support community needs in developing small business enterprises, youth opportunities in education and employment in 21st. century jobs, working in partnership with Community Board 9 and local organizations.

Community District Needs Related to Housing, Economic Development and Land Use

Needs for Land Use

Manhattan Community Board 9 proudly benefits from a long and rich tradition of historic preservation and tenant empowerment. As a result of these positions, many of the building stock in the community was not demolished in the 1970s or 1980s when landlords were abandoning the area, but instead most became limited-income HDFC cooperatives, while the remaining usually became non-profit owned affordable rentals. To this day, CB9 has the highest concentration of HDFC co-operatives in the City. As a result of this emphasis on preservation and tenant self-determination, there were relatively few vacant lots and soft sites in the neighborhoods. The exception to this, after the Manhattanville eminent domain use and rezoning for Columbia University, was Morningside Heights. Morningside Heights is unique in the overwhelming dominance of institutional owners whose building uses are frequently categorized as community facility space. The ability to agglomerate large assemblages of lots, the exemption to the New York State rent regulations that allow these institutions to remove housing units from rent regulation at the end of a tenancy, and the sky plane exposure-based 1960s zoning in the neighborhood means that Morningside Heights is uniquely vulnerable to unchecked, out-of-context luxury condominium development. The highest land use priority in CB9 is to rezone Morningside Heights with height-based zoning designations while upzoning the remaining potential development sites so that Mandatory Inclusionary Housing applies and affordable housing is required in any new development.

Needs for Housing

55% of households in Manhattan Community Board No. 9 (MCB9) are rent-burdened: 30% pay more than 50% of their income in rent, and 25% pay between 30% and 49% of their income in rent. Additionally, there are an estimated 206,000 open housing violations in MCD9, of which over 46,000 are Class C immediately hazardous violations, with an additional 111,000 Class B hazardous violations. The overwhelming majority of these violations (~30,000 of Class C, ~75,000 of Class B) occur in the Hamilton Heights/Sugar Hill area, with the rest (~12,000 of Class C, ~28,000 of Class B) mostly in Manhattanville. To address this crisis, MCB9 seeks to preserve and create affordable housing of various types--NYCHA, rent stabilized, rent controlled, coops/condominiums, HDFCs, TILs and 1-4 family townhouses. Additionally, enforcement of housing code violations and mandated repairs in rental units must be significantly increased, along with coordination with local nonprofits and the State Division of Housing and Community Renewal to secure the appropriate rent abatements and reductions for tenants due to the loss of services reflected in the violations. From 2007-2016, we estimate based on DOF data that MCD9 suffered a net loss of 1,824 rent regulated units of our stock of 16,932 units regulated at the start of 2007. We also ask that DOF conduct audits of any property owners who have reported a reduction of rent regulated units while in receipt of a tax abatement like 421a or J-51 which does not permit deregulation of units in the building. We also seek to have community input in development projects big and small--particularly any plans for "soft" development sites. Having a designated planner available to the HLUZ committee and the board, in general, would help greatly in this regard. Because CB9 has the largest concentration of HDFC cooperatives in New York State, funding for low-interest loans

for capital repairs to these buildings and other low-income homeowners, as well as tax abatements and technical assistance, are a very high priority. Additionally, the three NYCHA complexes in CB9 (Manhattanville Houses and Rehabs, General Grant Houses, and Audubon Houses) are in desperate need of capital repairs, with Audubon Houses having over 300 open work orders at the end of every month this year, Grant Houses having almost 4,500 open work orders at the end of each month, and Manhattanville Houses and Rehabs II and III collectively having over 3,700 open work orders at the end of each month. The 2017 Physical Needs Assessment identified \$42 million in necessary capital work at Audubon Houses, \$415 million in necessary work at Grant Houses, and \$316 million in necessary work at Manhattanville Houses and Rehabs II and III. This work must be completed to maintain NYCHA residents' housing in liveable conditions. Finally, MCD9 is in desperate need of more permanent, deeply-affordable supportive housing with on-site services. We strongly suggest HPD fund development of new affordable housing to further that goal at 1763 Amsterdam Avenue.

Needs for Economic Development

Manhattan Community Board No. 9 (MCB9) concerns itself with the processes by which Community Board 9 district's economy can become more robust, creating wealth and community benefits; anything that promotes opportunities for economic growth to the advantage of the citizens of the community. This involves financial resources to cultivate entrepreneurship as well as literacy rates, infrastructure, access to housing, and health care. These efforts are imperative as local employment remains stubbornly high compared to national levels (est. 11.2% in ZIP codes 10027 and 10031) and the persistent lower income levels in the district. MCB9 seeks to support the retention and expansion of startup entrepreneurs and existing businesses which could be Retail, Industrial or Nonprofit, so long as the projects create value and wealth for the MCB9 residents and the community. MCB9 would like to work closely with the New York City Economic Development Corporation (NYCEDC) to explore the best practices for supporting the existing manufacturing zone, referred to as the New Amsterdam Special Use District in the 197-a Plan, as currently being considered in the West Harlem Rezoning effort and repurposing the Marine Transfer Station to create economic opportunities for MCB9 residents. Presentations by NYC's Fresh Initiative representatives to discuss bringing healthy supermarkets, including a Farmer's Market to Hamilton Heights or northern Manhattanville. MCB9 works diligently to help small business owners, bodegas, street vendors and other entrepreneurial efforts in our district attain economic sustainability. National studies show that as many as 60 to 70% of new jobs will come from local companies, not new ones coming in. Therefore, and especially in view of the present global pandemic, it is vital that local companies get the help they need so that they can recover from the challenges that COVID-19 has caused and expand their capacity beyond levels at which they had previously operated. It is of paramount importance that businesses within MCB9 are connected to resources both in the kind of financial institutions as well as other kinds of nonstandard sources. Developing strategies that connect companies to local resources and export opportunities and reviewing regulatory processes for expanding an operation, in addition to infrastructure development can help our local companies. The development of sewer and water systems, power, natural gas, telecommunications, space, etc., are crucial to the operations and success of local companies. Additionally, NYC EDC, NYS ESDC, Columbia University, and private groups like Janus Properties have been investing in infrastructure to support and encourage the nascent biomedical and life sciences industry in the Manhattanville area centered on W 125th Street. It is imperative that job training and placement programs/workforce development enable local West Harlem residents to find employment in the new businesses that form in the area.

Manhattan Community Board 9

Most Important Issue Related to Transportation and Mobility

Roadway and traffic design

MCB9 has suffered from several poorly-planned roadway redesigns, most notably on Amsterdam Avenue north of 125th Street, where several lanes were removed and unprotected bike lanes were installed in each direction. These bike lanes are worse than useless, as the M11, M100, M101, and M104 bus lines all traverse Amsterdam Avenue, so there is constantly a bus in these new bike lanes, requiring cyclists to return to the main lanes of traffic. Additionally, traffic will get backed up for vehicles making left turns, and buses have been slowed by the removal of traffic lanes. The bike lanes should be removed and replaced with bus lanes. A limited network of PROTECTED bike lanes that enable safe cyclist travel throughout the district with minimal conflicts with bus routes and pedestrians should be studied and adopted ONLY WITH COMMUNITY INPUT, while unprotected bike lanes should be avoided. Additionally, the DOT has taken up more and more curbside spaces that were previously street parking for wasteful uses such as Zipcar spots. These spaces will need to be used for curbside trash pickup by DSNY. On wide streets like W 120th street, existing parallel parking should be replaced by angled parking.

Community District Needs Related to Transportation and Mobility

Needs for Traffic and Transportation Infrastructure

Manhattan Community District 9 needs additional curb extensions at Riverside Drive and W 120th street in order to reduce the time it takes for pedestrians to cross the intersection when heading north or south on Riverside Drive. W 120th Street between Broadway and Riverside also needs angled parking spaces on the north side of the intersection.

Needs for Transit Services

The M11 bus needs more frequent service, as the buses frequently operate only 20 or 25 minutes. These buses provide crucial transportation to seniors, the disabled, and other riders unable to take the subway.

PARKS, CULTURAL AND OTHER COMMUNITY FACILITIES

Manhattan Community Board 9

Most Important Issue Related to Parks, Cultural and Other Community Facilities

Park care and maintenance

As the population of Manhattan Community Board 9 returns to in-person socialization after long periods of isolation during the COVID-19 pandemic, our parks have continued to remain an essential space both during leisurely and perilous times. In addition to the recreational use of MCB9 parks, the open area at fields, courts and gardens in our parks provided the essential space for our community to safely socialize under social distancing mandates. With a nearly 20% increase in the MCB9 population our parks' outdated infrastructure has seen more than its fair share of duress. The MCB9 district needs Department of Parks care and maintenance in the form of capital improvements and enforced park regulations to satisfy not only the ever-growing recreational needs of MCB9 but also to maintain the safe and healthy impact that parks bring to our district. Necessary maintenance includes the renovation of turf and track in playgrounds like Annunciation Playground at W 134th Street and Amsterdam Avenue, where decades-old turf well past its useful life posed a safety threat to the young people who played baseball on the fields, or repairs to damaged comfort stations in parks, as well as the expansions through additions of new amenities such as a permanent dog park on Riverside Drive. At least two walkways (Riverside Park at 148th Street and St. Nicholas Park at 134th Street) are dangerously deteriorated and have been closed off to the public for many years. Much like MCB9's parks, its landmarks and historical districts are a major factor in the character and lifestyle of our district. Additionally, MCB9 has issued letters of support for two Requests for Evaluation of Historic Districts that are currently pending before the Landmarks Preservation Commission, the West Harlem Historic District and the Morningside Heights Historic District Expansion. Due to the efforts of preservationists and tenants of abandoned buildings during the 1970s, '80s, and '90s, MCB9 is home to some of the best-preserved contiguous architecture from the 1890s, 1900s, and 1910s. Along with the current plans outlined by our city agencies to improve the 175 acres of city parkland and preserve the character of West Harlem with its 27 designated landmarks and 3 historic districts, the request outlined below details specific items in which NYC agencies can reference as areas of major concern for the MCB9 district of Manhattan Landmarks Preservation and Parks needs. The MCB9 district needs Landmarks, monuments, sites of cultural significance (new or existing) in the form of areas officially designated for its historical relevance in West Harlem. The preservationists of MCB9 continue to diligently study and advocate for the designation of unrecognized historic areas within MCB9. With allocated resources from New York City to review these requests, we can ensure the positive impact that landmark preservation and historical designation has on MCB9.

Community District Needs Related to Parks, Cultural and Other Community Facilities

Needs for Parks

The preservation of landmarks and revival of parks within the Manhattan Community Board No. 9 (MCB9) district are ever more pressing needs for the district today than in the past. Along with the current plans outlined by our city agencies to improve the 175 acres of city parkland and preserve the character of West Harlem with its 27 designated landmarks, 2 historic parks and 3 historic districts, the budget request prioritizes specific items in which NYC agencies can reference as areas of major concern for the MCB9 district. Following the statistical trends of our area and desires of MCB9 stakeholders, our budget requests address the need for increased park regulations enforcement, the reconstruction of park infrastructure and allocated resources for the NYC Landmark Preservation Commission to review our request for historical designation. Our goals are to have safe green-spaces available and equipped to serve Harlem's growing population of 132,837 people as of 2020, up 18% since 2015 and to properly identify and to designate all qualifying landmarked structures and historical areas within MCB9. Additionally, during the past two years, our parks have seen a marked increase in homeless encampments, open substance abuse, and other public behaviors that detract from the spaces' ability to provide safe and secure recreation and athletic

outlets for families and children, particularly in Jacob Schiff Park, Jacob Schiff Playground, and Montefiore Park Plaza. Additional coordination between PEP and the Department of Homeless Services Street Outreach Consortium is necessary.

Needs for Cultural Services

Preserving and expanding support and cultural opportunities to all ethnic and cultural groups in our community ranked highest on our needs list, as we discussed the issues most important to the arts and cultural community of Manhattan Community Board Nine (MCB9). Local arts and cultural organizations need: • tools to collectively respond to economic challenges as they arise; • technical support to integrate and improve fundraising and marketing initiatives; • leadership and advocacy training are needed to educate the next generation of arts support and service delivery entrepreneurs; Manhattan Community Board No. 9 needs to identify ways to: • increase capacity; • improve outreach; • implement structural changes in such a way that we are prepared to meet fiscal challenges that force closings and curtailments. In this way, we are not simply reacting to each situation on a case by case basis without having a pre-established structure; In addition, MCB9 strongly supports the utilization of the arts and art appreciation as a means of community engagement, development, and empowerment. Finally, arts and cultural organizations frequently require designated spaces for performances, exhibitions, and installations, and as such are threatened by the growing lack of affordable space in our district. MCB9 needs newly dedicated arts and cultural spaces in our district to deal with the currently unmet demand for such spaces. Also, MCB9 needs support for existing spaces which sustainability is threatened by rising costs and other pressures. MCB9 also wants to acknowledge our community's history as a center of artistic and cultural innovation and encourage identification preservation, and restoration of historic theaters, other cultural sites, and artistic venues.

Needs for Library Services

Public Libraries provide our community with substantial educational support, not only for current K-12 students but also for parents, families with young children, English language learners, job seekers, and more. Libraries provide access to reading material, technology equipment, and educational programs (homework help, literacy programs, etc.). Manhattan Community Board No. 9 (MCB9) requests that a portion of the allocated funds be distributed to the libraries located within the MCB9 district to allow them to maintain staffing, increase days/hours of service, and increase the variety of programming and audiences they serve. Two libraries within MCB9 (George Bruce and Hamilton Grange) also have specific capital facilities needs. These libraries have unused custodial apartments that should be converted into usable library space. In both cases, some additional construction is required, chiefly to add elevator service to make the new space ADA compliant. Libraries could use this to provide warm and inviting spaces for teenagers, or additional classrooms in order to provide more regularly scheduled programming.

Needs for Community Boards

Manhattan Community Board No. 9 is requesting the Board's budget be increased. Given the size of our budgets, the cumulative effect of previous budget cuts, combined with those proposed and the increasing population in the district, any further cuts would minimize the effectiveness of the Community Board.
