Letter from DCP Director Daniel Garodnick

To my fellow New Yorkers:

Every year, each of New York City's 59 community boards advocate for the needs of its residents and stakeholders by preparing a Statement of Community District (CD) Needs and Community Board Budget Requests. Through this process, community boards share the top issues impacting their neighborhoods and propose capital and expense requests to address those identified needs. I'd like to thank the volunteer members of our community boards and the District Managers who work so hard in leading this essential process and in preparing these reports.

The annual CD Needs process is the product of months of collaboration and public input and is a valuable tool for New Yorkers to participate in neighborhood planning. At the broadest levels, CD Needs offers a critical window into the challenges faced by New Yorkers, and how those challenges may differ across neighborhoods. At a granular level, it provides a forum through which community leaders specify those needs and make recommendations for spending -- which in turn are used by City agencies, elected officials, advocacy groups, and non-profit service providers, among others, to better understand and meet the individual needs of each community board.

Through this year's submissions, we heard the stories of our communities' biggest challenges, such as the human impacts of our housing crisis. In that vein, community boards again selected affordable housing as the most pressing issue citywide, followed by crime and public safety, and parks and open space. Through our online form, community boards generated more than 3,700 budget requests, and for each, one of 28 City agencies responded to indicate whether the request could be accommodated within the upcoming annual budget. This year, in line with our commitment to increasing transparency across the CD Needs process, we are publishing agency responses to these requests in the final section of these reports.

DCP deeply values our partnership with community boards. We remain committed to supporting them by increasing participation in, and improving the transparency of, the CD Needs process. We have received valuable feedback from our community board partners, and we are excited to work with them to continue improving our online submission form, to connect boards with agencies to advance budget request proposals, and to open the form earlier in the calendar year to allow more time for public input and preparation. We look forward to advancing this work with both community boards and City agencies to ensure this is a valuable and productive way to improve our City's neighborhoods and to respond to local community needs.

Sincerely,

INTRODUCTION

The annual Statements of Community District Needs (CD Needs Statements) and Community Board Budget Requests (Budget Requests) are Charter mandates that form an integral part of the City's budget process. Together, they are intended to support communities in their ongoing consultations with city agencies, elected officials and other key stakeholders and influence more informed decision making on a broad range of local planning and budget priorities. This report also provides a valuable public resource for neighborhood planning and research purposes, and may be used by a variety of audiences seeking information about New York City's diverse communities.

HOW TO USE THIS REPORT

This report represents the Statement of Community District Needs and Community Board Budget Requests for Fiscal Year (FY) 2024. This report contains the formatted but otherwise unedited content provided by the community board, collected through an online form available to community boards from July to November, 2022.

Community boards may provide substantive supplemental information together with their Statements and Budget Requests. This supporting material can be accessed by clicking on the links provided in the document or by copying and pasting them into a web browser, such as Chrome, Safari or Firefox.

This report is broadly structured as follows:

1. Overarching Community District Needs

Sections 1 – 4 provide an overview of the community district and the top three pressing issues affecting this district overall as identified by the community board. Any narrative provided by the board supporting their selection of their top three pressing issues is included.

2. Policy Area-Specific District Needs

Section 5 is organized by seven distinct policy areas aligned with the service and program areas of city agencies. For each policy area, community boards selected the most important issue for their districts and could provide a supporting narrative. The policy area section also includes any agency-specific needs and a list of relevant budget requests submitted by the community board. If the community board submitted additional information outside of a specific policy area, it may be found in Section 6.

3. Community Board Budget Requests

The final section includes the two types of budget requests submitted to the City for the FY24 budget cycle; one list for capital and another for expense budget requests. For each budget request, community boards were able to provide a priority number, explanation, location, and supporters. OMB remains the definitive source on budget requests submitted to city agencies.

Disclaimer

This report represents the Statements of Community District Needs and Community Board Budget Requests of this Community District for Fiscal Year 2024. This report contains the formatted but otherwise unedited content provided by the community board.

Budget Requests: Listed for informational purposes only. OMB remains the definitive source on budget requests and budget request responses.

Budget Priorities: Priority numbers apply to expense and capital Budget requests from all policy areas. A complete list of expense and capital budget requests by this Board sorted by priority can be found in Section 7 of this document.

Supporting Materials: Some community boards provided substantive supplemental information. This supportive material can be accessed by clicking on the links provided in the document or by copying and pasting the links provided in the Appendix into a browser.

Statement on Data Accuracy

Under Title 13 of the U.S. Code, the Census Bureau is legally bound to protect the privacy of individuals participating in the decennial census. To adhere to the law and to avoid the disclosure of information about individual respondents, the Census Bureau has historically applied a host of techniques, such as top- and bottom-coding, imputation, table- and cell-suppression, and data swapping. The Census Bureau is employing a new technique with the 2020 Census, referred to as the Disclosure Avoidance System (DAS), based on differential privacy. With this approach, the Census Bureau “infuses noise” systematically across census data and sets a quantified disclosure risk, referred to as the Privacy Loss Budget (PLB).

While the new DAS approach may diminish the risk of disclosure concerns, it comes at a cost to data accuracy. Consequently, 2020 Census data users should be aware that all sub-state counts, except for housing units (which are unaffected by the DAS), may be adjusted to protect the privacy of Census participants and may be subject to reduced accuracy. Because DAS noise infusion is randomized, it is impossible for data users to know the degree to which any individual statistic is altered. However, it is possible to say that in general the relative size of errors decreases as counts increase. Consequently, data users should have greater confidence in the accuracy of the data as counts get larger. Further, an evaluation of a Privacy-Protected Microdata File (PPMF), treated with a Disclosure Avoidance System like the one applied to 2020 redistricting data, showed that counts of 300 or more rarely have sizable errors (error beyond +/- 10% of the count). Therefore, while data users need to be cognizant of data accuracy limitations, they should have confidence in conclusions based on sizable counts, which are relatively unaffected by the Census Bureau’s latest disclosure avoidance method.

3. OVERVIEW OF COMMUNITY DISTRICT

Community Board 2 represents the areas of Sunnyside, Woodside, Long Island City, Blissville and a portion of West Maspeth. The district is bounded on the north by Queens Plaza North, the northern property line of the Sunnyside Rail Yard and Northern Boulevard; on the east by the ConRail Property; on the south by Calamus, Maurice and Maspeth Avenues and Newtown Creek; on the west by the East River.

Community Board 2 has a wide variety of residential housing options, including one, two and three family private homes, two primarily residential landmark districts: Sunnyside Gardens Historic District and the Hunter's Point Historic District, and a wealth of multifamily apartment options, including the burgeoning new communities in Long Island City: Hunters Point South, Queens West and Court Square, coined the fastest growing neighborhoods in the nation. In recent years this new high-rise residential development has been extended east to sites along both Queens Boulevard and Roosevelt Avenue in Sunnyside and Woodside. Finally, in LIC are also communities zoned for manufacturing only, like Blissville, containing manufacturing and grandfathered homes. Today, Blissville houses our most vulnerable in permanent homeless shelters and converted hotels.

CB2 is home to:

- an emerging 21st century economy and an active Industrial Business Zone (IBZ) and Newtown Creek which is a significant, maritime, and industrial area (SMIA) dedicated to preserving manufacturing and industry in NY.
- a vibrant arts community including PS1 Contemporary Art Museum, LaGuardia Performing Arts Center, CultureLab LIC, Thalia Hispanic Theatre, the Turkish Cultural Center, Ecuadorian American Cultural Center, Topaz Arts, and Silvercup Studios.
- a robust higher educational facility, LaGuardia Community College, that in 2019 enrolled over 30,000 students from 150 nations.
- several thriving areas of small businesses and manufacturers, including 2 (?) IBZ districts. These segments of CB2 are critical to the entire city's economy and are vulnerable to zoning changes and rising rents.

CB2 is served by many dedicated community-based nonprofits. The Long Island City Partnership and the Sunnyside Business Improvement District both work to improve and enhance commercial districts. Sunnyside Community Services, Woodside on the Move, Hunters Point Park Conservancy, Court Square Civic Association, Blissville Civic Association and Catholic Migration Services serve families most in need and work to enrich and preserve quality of life for residents.

Access by mass transit to various locations in CB2 include the #7, E, M, F, G, N, W, R subway lines and many bus lines. A rapidly growing network of bicycle lanes supports commuters throughout the district. However, there are neighborhoods within our district who remain in a transportation desert such as the Blissville section of Long Island City, Wynwood Gardens in Woodside, parts of Maspeth and the far reaches of Hunters Point South.

4. TOP THREE PRESSING ISSUES OVERALL

Queens Community Board 2

The three most pressing issues facing this Community Board are:

Land use trends (zoning, development, neighborhood preservation, etc.)

A. Rezoning CB2 has experienced record real estate development and exponential population growth over the past two decades. Rezoning, particularly in Long Island City and along Queens Boulevard, that originally aimed toward commercial growth, poorly anticipated the residential boom and the pressure this has placed on every aspect of the community's needs. Residential real estate development has outpaced the provision of essential services, upkeep of the infrastructure, schools, roads, transit, and open space. Rezoning in Sunnyside and Woodside along Queens Boulevard that incentivized additional floor area ratio (FAR) to provide optional affordable housing through the City's initial Inclusionary Housing Program has failed to produce many new affordable apartments for existing residents in the District. (One recent Zoning Text Amendment in Woodside includes Mandatory Inclusionary Housing but those units have not yet been constructed.) Rent levels of 130% AMI, which are most commonly offered in privately financed MIH buildings, are unaffordable to those local residents most in need, and do little to alleviate the housing crisis. An exception is a building on Barnett Ave which has been approved, and will have 100% affordable units, ranging from 30 to 80% AMI. In the last few years, multiple individual sites along Roosevelt Avenue and between Roosevelt and Queens Boulevard have been subject to developer initiated-rezoning to enable new high-rise residential or mixed-use construction, typically much higher than the surrounding residential and commercial fabric. This increased density is not accompanied by substantive city or developer financed improvements in infrastructure, particularly transit, public green spaces, and public school capacity, which are already overburdened. Also lacking, particularly in Woodside, are improvements to the existing streetscapes. A more comprehensive and coordinated plan for Roosevelt Avenue, in lieu of the on-going but haphazard rezoning, is badly needed in this part of the CB2 district.

B. Rising Housing Costs Rising housing costs have become a destabilizing factor. Long time renters are being displaced by increased housing costs. Small homeowners - many on fixed incomes - have experienced large property tax increases. The cost of local retail, including basics such as food and other groceries have significantly risen. Very few working class, public employees, or small business owners can afford to buy property. Many properties that come on the market are available as knock downs for development or for speculation. Those that are retained are modernized with an eye toward an upscale market (the previous owners often having previously neglected the property's condition).

1. Affordable housing CB2 is seeking a significant number of additional units of affordable housing, ideally for both rental and home ownership, and expanded opportunities for low- and moderate-income residents already living in the community. In addition, renters and homeowners will continue to need housing counseling assistance to preserve and protect their homes in the district.

2. Sheltered and Unhoused Individuals and Families Community Board 2 has experienced an increase of homelessness within our district during the past few years. And, more recently during the COVID-19 emergency, the temporary shelter population in CB2 and adjacent CB1 has spiked. Individuals facing these circumstances can be found in clusters within the district. Some of the more noticeable include encampments behind Big Bush Park, under the elevated #7 subway stations in Sunnyside and Woodside, including the 61st Street MTA/LIRR ticket booth areas as well as under overpasses along the BQE near Laurel Hill Boulevard. Increased crucial services for our most vulnerable homeless residents and homeless service providers are needed to support these vulnerable New Yorkers, especially now, when we are still in the ongoing fight to slow the pandemic. According to DHS as of October 2022, CB2 is home to six shelters with a total of 548 residents. These include two permanent shelters, the Metro Family Shelter in Woodside, and the North Star Shelter in Blissville and 4 temporary shelters (two of which are in Blissville). We support our unhoused neighbors and the right to shelter, and we are deeply concerned that there are not sufficient resources to support these vulnerable populations. Blissville is zoned Industrial/Manufacturing and lacks basic services such as greenspace, supermarkets, laundry facilities and schools as well as limited public transportation options and adjacent to one of our Nation's largest superfund sites. Additionally, the identification of sites and resettling of unhoused families in the temporary shelters, especially in Blissville, has been disorganized and disruptive to the residents and the community in and around Blissville. Furthermore, the recent sharp increase in asylum seekers has caused New York City to experience a corresponding explosion in housing needs, with now

around 11,000 individuals having entered New York City's shelter system since May 2022. The City must seek and allocate sufficient resources to ensure that housing sites have security plans and supportive services; that permanent housing programs are adequately funded; and that local nonprofits, which will inevitably be tasked with helping these individuals, receive the support they need to do so. C. Rapidly increasing commercial rents. The district has a wealth of small and large manufacturers, tech companies, design firms, retail, and service industries that innovate and provide jobs. Many have been part of the community for decades. Some are new. All experience the exceptional pressure of rapidly rising rents, resulting in higher failure rates, turnover, layoffs, and unemployment. Often zoning allows former manufacturing lots to be replaced by housing which further exacerbates the ongoing problems. Zoning has also allowed existing space appropriate for small manufacturers to be replaced by higher cost office space that is not suited for industry. D. Impact on artists Community Board 2 has been home to a vast community of creative individuals and groups who have given the area much of its unique identity and being an important sector for economic growth. PS1 / MoMa is a prime example of how a fledgling space for artist studios evolved into a world class museum that provides a wide range of jobs, artist opportunities, and tourism revenue. And an important synergy exists between local businesses, manufacturers, and artisans - each able to share unique capabilities and ideas, where the economic whole becomes greater than the sum. Our district is home to professional dancers, actors, composers, writers, and musicians who work in a professional capacity while innovating and experimenting on their own. This creative sector is among the most immediately threatened populations in the district. Zoning has allowed existing productive space to be replaced by space more suited for new and often speculative ventures while permanently eliminating the community that has played a major role in placing the district on the map. We need a community center that facilitates the incubation and support of these artists who define the character of the district. E. Neighborhood Preservation The district has experienced many rezoning and "development" challenges that continue to bring new housing opportunities and businesses to our community. However, often these come at the expense of preserving the character, diversity, and landscape of what is already here. Support is needed to sustain the existing infrastructure, maintain our scarce resources of public and open space and support our diverse community of homeowners, renters, families, seniors, immigrants, workers, school children, businesses and artists while seeking to pursue important housing, economic development and land use challenges of the post-COVID 19 era. Our budget requests are informed by the basic necessity to preserve, protect and expand housing and economic opportunity without compromising the quality, character, services, and economy of existing neighborhoods of CB2. There are multiple overlapping aspects we see as part and parcel of neighborhood preservation. Older established neighborhoods are experiencing destabilizing levels of density and displacement and diminished services. Newer neighborhoods are having difficulty becoming and sustaining as neighborhoods because costs encourage higher turnover. Basic services and entities part of an organically evolved community do not exist.

Parks and open space

Parks, Culture & Other Community Facilities, especially those communities within our district absent Parks, Playgrounds and Greenspace and remain part of the 1% of NYC residents who must walk greater than 20 minutes to reach a park or greenspace.

Other

Environmental Concerns: The inadequately addressed challenges of climate change include sea level rise of particular concern for the district's vast waterfront. As current information is compiled, we learn that the inland effects are potentially greater than understood even in recent planning, which has been exacerbated by the lack of public green space, for example only 29% of LIC's population live within a 5 minute walk to a green space and there is only .4 acres of green space per 1,000 residents compared to 2.5 acres citywide. Other environmental issues that stem from overdevelopment a lack of comprehensive planning include poor air quality from traffic congestion, rats from excavation including a lack of street cleaning in large parts of the District, the ongoing LIRR Borden Avenue train yard diesel fume air pollution from idling trains, and continual dust, debris, and contaminants in the air from construction sites. From NYCAS 2019 data, Long Island City has an average of 8.0 PM2.5 particles compared to 6.5 through Queens and 6.6 Citywide. Woodside/Sunnyside has even worse air quality at 8.4 PM 2.5, which health studies have shown long term exposure leads to increased rates of chronic bronchitis, reduced lung function and increased mortality from lung cancer and heart disease, in particular affecting the young and elderly. CB2 would like to see a greater prioritization of Public EV Chargers within the District given the unproportional cost to adverse air

quality within our neighborhoods to the rest of the City. Combined sewage runoffs, in particular when it rains, create billions of gallons of waste overflow into local waterways throughout Newtown Creek and the East River. Although new City rules require new developments to retain significant amounts of rainwater on site, using tools such as green roofs and porous pavements, climate change has exacerbated and accelerated more frequent rain storms and flash flooding, worsening existing conditions.

5. SUMMARY OF COMMUNITY DISTRICT NEEDS AND BUDGET REQUESTS

HEALTH CARE AND HUMAN SERVICES

Queens Community Board 2

Most Important Issue Related to Health Care and Human Services

Health facilities (existing conditions, capacity, new facilities, etc.)

Despite the significant population growth of the District, the area and in particular Western Queens continues to lack primary care medical facilities and outpatient clinics. Our families have to travel out of the district for public pediatric and maternity care. With one of the largest populations of senior citizens, CB2 needs additional support for senior services and modern, full-service senior center facilities. We'd request the City explore a study to expand the City run hospital (NYC Health + Hospitals) location to CB2 District and/or incentivize a private facility to come to the area. During the COVID 19 emergency, it has become evident that food insecurity is a problem for families and seniors. While nonprofits organizations and volunteers have pitched in during the crisis, CB2 requests that the City administration support the efforts of volunteers by establishing a public food pantry in CB2, or partner with existing efforts from organizations such as Mosaic Church. B. Healthcare outreach During the pandemic our ability to reach homebound community members was severely curtailed. This was especially concerning when it came to vaccination. We must act proactively to find ways to protect these residents and their caregivers. C. Healthcare Accessibility There is a severe present need for access to existing hospitals beyond the district. Concurrent with the request to expand City run hospitals to CB2 district we ask the City to explore establishing a ferry route to the Manhattan East Side hospitals.

Capital Requests Related to Health Care and Human Services

Priority	Agency	Request	Explanation	Location
2/53	HHC	Provide a new or expanded health care facility	<i>Comprehensive women's health services via Elmhurst Hospital include a birthing center</i>	
3/53	HHC	Provide a new or expanded health care facility	<i>Increase number of health care facilities due to COVID-19 and hospital closings in Western Queens within CB 2, expand primary care services to CB 2 area as part of the Caring Neighborhood Initiative.</i>	
4/53	HRA	Other request for services to support low-income New Yorkers	<i>Establish a formal food pantry in the CB 2 district with SCS.</i>	
23/53	DFTA	Renovate or upgrade a senior center	<i>Funding site acquisition for site for a new senior / community center in Hunters Point. Replace Center formally in St. Marys.</i>	

Expense Requests Related to Health Care and Human Services

Priority	Agency	Request	Explanation	Location
10/44	DHS	Other request for services for the homeless	<i>Other homelessness prevention program request - Allocate funds for a study and creation of a comprehensive approach to address unhoused and shelters and the pathway from homelessness to shelter to supportive housing to housing. Engage shelters and unhoused to understand the needs for the district and how it intersects with overall affordable housing needs.</i>	
13/44	DFTA	Other senior center program requests	<i>Increase funds for DFTA to meet growing demands for day care programs for seniors including Alzheimer's programs to establish a baseline for funding. Request agency make a community survey to gather aging population data in CB 2 District.</i>	

14/44	HRA	Provide, expand, or enhance educational programs for adults	<i>Provide funding for immigrant services such as legal citizenship assistance and ESL. Support for community organizations such as Jacob A. Riis neighborhood settlement, Queens public Library, Sunnyside Community Services and Woodside on the Move to provide programs for immigrant services.</i>
20/44	DHS	Other facilities for the homeless requests	<i>Provide WIFI digital access for homeless shelters so that children can learn remotely.</i>
22/44	DFTA	Allocate funds for outreach services to homebound older adults and for programs that allow the elderly to age in place	<i>Decrease isolation experienced by homebound seniors and persons with disabilities throughout Queens CB2. Provide funding for remote social adult day services programs.</i>
27/44	DOHMH	Animal and pest control requests including reducing rat and mosquito populations	<i>Continue funding NYCDOH bureau of pest control for rodent abatement, mosquito control and invasive species within CB 2.</i>
43/44	DFTA	Enhance home care services	<i>Increase to DFTA to meet growing demands for homecare services within the boundaries of CB 2 Queens.</i>

YOUTH, EDUCATION AND CHILD WELFARE

Queens Community Board 2

Most Important Issue Related to Youth, Education and Child Welfare

Support services for special needs youth (disabled, immigrant, non-English proficient, etc.)

The Sunnyside and Woodside areas have a high immigrant population in which parents aren't always proficient in speaking English. According to NYC Department of City Planning (DCP), 40% of residents 5 years or older have limited English proficiency as compared to 29% in Queens and 23% in NYC overall. English as a Second Language (ESL) programs such as those provided by Sunnyside Community Services need to be protected and adequately funded. There is also a need throughout the CB district for publicly accessible locations for youth and child welfare service. The construction of schools and provision of youth services, such as Summer Youth Employment Programs, have lagged behind the population growth in CB2, particularly in Long Island City. The 2018 Economic Development Corporation (EDC) LIC Investment Strategy publication included a goal to, "expeditiously, bring online pipeline projects to meet the current needs for additional school seats while also planning for additional population growth and future needs". EDC identified a need for \$60M for the construction of a school in the Court Square neighborhood within School District 30, for which a site has still not been identified or built, despite efforts by the School Construction Authority. In addition, corollary youth services, a multi-service youth center, early child education and a Beacon School should be identified. In UC, the city owned Department of Education building could serve as a venue for youth and community service.

Law Enforcement Role. Important as are the police for public safety, it is recognized that many functions traditionally assigned to the police can and should be accomplished through alternative services. For example, street safety can be promoted by roadway re-design and automated enforcement. Further, we seek meaningful in person community policing. We'd like to see police regularly on foot or on bikes. We like to see a transformation of their ethos from the current situation where they are "officers" with military ranks and the rest of the community are "civilians." Human service professionals are needed to actively engage in policing operations and not just to provide training for police in community engagement, domestic violence, mental illness sensitivity training.

CORE INFRASTRUCTURE, CITY SERVICES AND RESILIENCY

Queens Community Board 2

Most Important Issue Related to Core Infrastructure, City Services and Resiliency.

Environmental concerns affecting citizens

Core infrastructure throughout the district is aging and requires ongoing repair. A.Sewer infrastructure-Deteriorating sewer infrastructure in Long Island City is legendary for insufficient capacity. In 2018 EDC LIC Investment Strategy included primary goal to "improve water and sewer infrastructure to strengthen current service and enhance resiliency infrastructure" and \$95M was proposed to implement a first phase of sewer upgrades and complete the LIC amended drainage plan (ADP). CB2 agrees and requests that the City administration upholds this priority to complete the ADP and implement the first phase of sewer upgrades. CB2 also recommends that large impermeable surfaces be redesigned to reduce runoff into the sewer system utilizing permeable pavers and green infrastructure. B.Air quality-LIRR has major facilities in CB2, including the massive Sunnyside Yards and the Borden Avenue rail yard for its double decker trains. The double decker trains are diesel fueled and their engines are operated 24-hours a day, including when parked in Borden Avenue yard. These create constant air and noise pollution. C.Graffiti tagging of local businesses has increased throughout the district (Blissville/Sunnyside). While volunteers have played a major role in graffiti removal, during the COVID-19 crisis, the City needs to restore and expand programs to remove graffiti. D.Rat infestation is a problem throughout the district due to prevalence of construction. Other hot spots include Greenpoint Avenue in Sunnyside, and between Review and Borden Avenue in Blissville, LIC. E.Litter and dumping of waste throughout district has increased over last few years during COVID crisis. The district needs more and better street trash containers and an increase in frequency and number of street trash collections. F.Sanitation services-DSNY to fund a demonstration project with large community bins to complement or replace curbside services in certain low density residential areas. We seek funding for community pantry gardens which collect organic waste for composting and soil enrichment. Projects like this build community connectedness and, hence, resilience. G.Public space (non-street) snow removal. Snow is typically not removed from sidewalks adjacent to parks, creating pedestrian hazards especially in parks adjacent to transit stops. There has been an inadequate response to the removal of snow and ice from fire hydrants, sidewalks and other pedestrian paths throughout the district, particularly at ADA Compliant Pedestrian Ramps. There is pressing need to acquire enough Bobcats and other equipment to clear non-vehicular paths and allocate sufficient personnel and resources to address these dangerous conditions. H.Waterfront Resiliency-Deteriorating bulkheads along Newtown Creek and flooding along East River waterfront. Requesting DCP initiate a comprehensive planning process for development sites on LIC waterfront and Vernon Boulevard corridor community as was promised.

HOUSING, ECONOMIC DEVELOPMENT AND LAND USE

Queens Community Board 2

Most Important Issue Related to Housing, Economic Development and Land Use

Other

A. Affordable housing creation - Among the most important and integrally significant issues is availability of truly affordable housing. According to the Partnership for New York City, "Housing affordability posed a challenge before COVID-19, with nearly 40% of metropolitan regions residents paying more than 30% of their income in rent." COVID-19 related job losses add to this burden. In CB2 43% pay 35% or more of their income on rent. CB2 is seeking a significant number of additional units of affordable housing and expanded opportunities for low- and moderate-income residents in the community.

B. Economic Development - Prior to 2020, our district needed economic revitalization for existing storefront businesses, small manufacturers, creative individuals, and organizations. High rents, combined with residential conversions pressured existing small businesses, which reduced growth and job opportunities. The pandemic crisis has brought the small business community to a near halt eliminating an unprecedented number of jobs throughout the district and forcing several businesses to permanently close. Up to now, the City's economic development strategy has largely focused on supporting forward leaning trends within the technology and biotech fields and development of future centers for innovation and job training. There is an immediate need for equal if not more attention to existing small businesses. Funds should be provided to enable businesses to hire back employees and hire and train new employees. Funds need to be provided to allow businesses to maintain their ongoing costs. And funding should be provided to increase the visibility and attractiveness of commercial strips. The LIC Partnership and Sunnyside Shines Business Improvement District (BID) support businesses in their geographic regions but more needs to be done, especially in Woodside and Sunnyside to help small storefront businesses to succeed. CB2 is also seeing the emergence of rezoning in the industrial business zone (IBZ) that enables a hybrid industrial commercial/office zone. These rezoning efforts propose to expand job opportunities; however, they also threaten the existing makeup of the IBZ. The City needs to protect industrial and small businesses in these rezoning areas, to protect affordable rents and workspace for existing businesses.

C. Land Use - Land Use actions need to balance the ongoing growth of the district with the needs of the established community. Development has far outpaced the potential for improvements to core infrastructure that had fallen behind. Additionally, land use actions have favored large scale developers who benefit from significant tax incentive programs and who attract higher income tenants. This has created an added tax burden for small property owners. And because many of the smaller stores cannot afford to remain, there are increased costs for food and other goods and services. These economic changes are not merely inconveniences.

Queens Community Board 2

Most Important Issue Related to Transportation and Mobility

Subway service and quality (frequency, access, crowding, etc.)

The district uses mass transportation when traveling. CB2 is generally well-served by mass transit, trains are overcrowded. Capacity issues remain despite the completion of a major 10 year capital improvements on the 7 line. Efforts should be made to provide frequent, reliable service. Long term, a promised stop in Sunnyside should be provided as part of the LIRR East Side Access project. as well as cross-honoring MTA fares on the LIRR from stations in the City. Accessibility to subway system is both mandated by the Americans with Disabilities Act and is a matter of equity. The lack of accessibility is a major concern and volume of commuters at the 61st St. station has increased, causing constant maintenance issues of the escalator (MTA) and elevator (LIRR). More needs to be done to ensure both are working properly regularly. Paratransit services (Access-A-Ride) need improvement so they are as flexible and usable as mass transit.. NYC Planning proposed a city wide text amendment to fund the construction of subway elevators in exchange for higher density for private developers, CB2 would like to see the program expanded to include public restrooms, as inadequate public facilities have led to human waste in subway stations. Improved bus service, including bus-only lanes and select buses need to be explored to increase capacity. Over the past few years, bike lanes, car share services, Citi Bike stations and other forms of multimodal transportation have become increasingly available in the City and particularly in CB2. Our community strongly supports improving neighborhood connectivity and facilitating multimodal transportation while creating a safer experience for vulnerable road users. Private vehicle ownership has been a long tradition in our community. Parking is increasingly difficult to find. Residents who own cars would like to keep and park them on our streets. Because of the severe threat of climate change, we would like to discourage new residents from moving here with cars. There is increasing recognition that using private cars in urban environments has a negative effect on the environment. The availability of parking for homeowners and local businesses remains a priority, which will be strained by the introduction of congestion pricing. To prevent commuters from using our district as a parking lot, 12 hour metering should be replaced by 4 hour, or market-rate pricing. Consideration should balance the needs of existing and emerging modes of transportation. During the pandemic private car registrations increased. Directly across the East River from Manhattan and north of Brooklyn it is crossed by two major highways-LIC and BQE, Queens Blvd is heavily used to access the Queens Borough Bridge. CB2 is a transportation desert. Solutions such as .the proposed QNS would reactivate the lower Montauk Branch of the LIRR for NYC Transit Fares with local stops from Jamaica to LIC with stops in Hunters Point, Blissville and Larue Hill.

PARKS, CULTURAL AND OTHER COMMUNITY FACILITIES

Queens Community Board 2

Most Important Issue Related to Parks, Cultural and Other Community Facilities

Insufficient park or open space

COVID 19 has reminded us of the importance of parks and other public spaces because these were places where people could exercise and socialize safely. With the Open Culture program, our streets have become cultural venues, along with farmers' markets and Open Restaurants. The quarantine has reinforced the need for good ventilation, open space, clean air to enable safe supports that bind the community together. Long Island City is known as the fastest growing neighborhood in the country and it also has the lowest ratio of people to open space. The overdevelopment of the area in a relatively short period of time has left the Hunters Point, Dutch Kills, and Court Square neighborhoods at a severe deficit. Court Square was initially re-zoned for commercial development however, commercial development did not occur at the pace predicted and instead residential development has exploded. This neighborhood lacks sufficient open space and schools needed to accommodate this growth. Existing publicly owned spaces such as the LIC Underline or Ramps Public Space should be expanded for public community use. Although Blissville is primarily an industrial and manufacturing area, there is a core of group residents totaling over 1,000 that live there - some for generations - along with a cluster of shelters (1 permanent and 2 commercial hotels) housing our most vulnerable population of sheltered homeless. Residents of this community have been seeking to work with the city to identify recreational park space for many years. Recently the addition of the Kosciuszko Bridge pedestrian/bike path has led to a request for the City to do a feasibility study of creating a pedestrian and bicycle greenway and park benches along Review Avenue between Laurel Hill (Kosciuszko Bridge) and the Greenpoint Avenue Bridge. Similar concerns apply to other areas south of Queens Boulevard and those sections of Maspeth and Woodside which have little or no park and community gathering space. In addition to the Blissville Greenway; the City should consider how to support the creation of the Dutch Kills Loop. Greenspace maintenance and development Parts of the district have historic and prized tree canopies. However, many of these trees in CB2 have fallen or been removed because of decay, which can and have become dangerous to residents and property. Accordingly, we support funding for continued tree planting and care of existing trees, including new and replacement street trees in CB2 District.
